

# Solaris Oilfield Infrastructure Announces Fourth Quarter And Full Year 2018 Results

February 27, 2019

## Fourth Quarter and Full Year 2018 Highlights

- Net income of \$86.0 million, or \$1.59 per diluted Class A share, for the year ended December 31, 2018; net income of \$24.7 million, or \$0.47 per diluted Class A share, in fourth quarter 2018
- Adjusted EBITDA of \$123.4 million for the year ended December 31, 2018; adjusted EBITDA of \$34.9 million in fourth quarter 2018
- Ended the year with 160 proppant management systems and 3 chemical management systems in the rental fleet
- Declared a regular quarterly dividend of \$0.10 per share on December 6, 2018

HOUSTON--(BUSINESS WIRE)-- Solaris Oilfield Infrastructure, Inc. (NYSE:SOI) ("Solaris" or the "Company"), a leading independent provider of supply chain management and logistics solutions designed to drive efficiencies and reduce costs for the oil and natural gas industry, today reported financial results for the fourth quarter and full year 2018.

## Full Year 2018 Financial Review

Solaris reported full year 2018 net income of \$86.0 million, or \$1.59 per diluted Class A share, compared to full year 2017 net income of \$22.5 million, or \$0.27 per diluted Class A share. Adjusted pro forma net income for the full year 2018 was \$79.6 million, or \$1.69 per fully diluted share, an increase of \$58.5 million and \$1.21 per fully diluted share from full year 2017 pro forma net income. A description of adjusted pro forma net income and a reconciliation to net income attributable to Solaris, its most directly comparable GAAP measure, and the computation of adjusted pro forma earnings per fully diluted share are provided below.

Revenues were \$137.12 million for the full year 2018, an increase of \$129.8 million, compared to 2017.

During 2018, the Company generated 40,526 revenue days, the combined number of days that its systems earned revenue during the year, a 142% increase compared to 2017. The increase in revenue days were driven by an increase in customer demand and adoption for Solaris' systems as consumption and intensity of proppant increased across the industry.

### **Fourth Quarter 2018 Financial Review**

Solaris reported net income of \$24.7 million, or \$0.47 per diluted Class A share, for fourth quarter 2018, compared to net income of \$26.4 million, or \$0.49 per diluted Class A share, in third quarter 2018 and net income of \$9.2 million, or \$0.13 per diluted Class A share, in fourth quarter 2017. Adjusted pro forma net income for fourth quarter 2018 was \$21.6 million, or \$0.45 per fully diluted share, a decrease of \$2.4 million and \$0.06 per fully diluted share from third quarter 2018 and an increase of \$12.7 million and \$0.25 per fully diluted share compared to fourth quarter 2017. A description of adjusted pro forma net income and a reconciliation to net income attributable to Solaris, its most directly comparable generally accepted accounting principles ("GAAP") measure, and the computation of adjusted pro forma earnings per fully diluted share are provided below.

Adjusted EBITDA for fourth quarter 2018 was \$34.9 million, a decrease of \$1.6 million compared to third quarter 2018 and an increase of \$19.7 million from fourth quarter 2017. A description of adjusted EBITDA and a reconciliation to net income, its most directly comparable GAAP measure, is provided below.

Revenues were \$57.3 million for fourth quarter 2018, an increase of \$0.7 million, or 1%, compared to third quarter 2018, and an increase of \$32.1 million, or 127%, compared to fourth quarter 2017.

During fourth quarter 2018, the Company generated 11,155 revenue days, the combined number of days that its systems earned revenue during the quarter, a 6% decrease from third quarter 2018, and up 82% compared to fourth quarter 2017. Revenue days were down sequentially in fourth quarter 2018 due to reduced industry activity levels, which resulted from seasonal customer spending declines and commodity price volatility.

### **Capital Expenditures and Liquidity**

management systems, and the completion of the Kingfisher Facility. These investments help address customer demand for Solaris' products and services and are expected to drive future earnings and cash flow growth for Solaris.

As of December 31, 2018, the Company had approximately \$82.1 million of liquidity, including \$25.1 million in cash and \$57.0 million of availability under its credit facility, net of \$13.0 million of outstanding borrowings. Subsequent to year end, the Company repaid all of its outstanding borrowings under its credit facility with cash on hand.

### **Operational Update and Outlook**

Solaris ended December 2018 with 160 mobile proppant management systems and 3 mobile chemical management systems in the rental fleet. Based on current industry activity levels, the Company believes it has approximately 1/3 of overall U.S. wellsite proppant storage market share which represents the leading share. The Company expects to end the first quarter 2019 with 163 mobile proppant management systems and 10 mobile chemical management systems in the rental fleet.

Solaris' Chairman and Chief Executive Officer Bill Zartler commented, "Over the course of 2018 we outperformed overall industry activity levels, including more than doubling our fleet size and introducing several new products and enhancements. These new introductions, including the industry's first silo-based chemical management systems and complete automation of our mobile sand systems, will provide additional growth potential for Solaris. Our solutions reduce labor requirements and improve wellsite safety for our customers, which is critical for success during this time of commodity price uncertainty and upstream capital spending discipline. We will continue to innovate and be thought leaders in driving this efficiency for our customers, and at the same time will exercise capital discipline in our business – only deploying capital when we think we can generate an attractive return for our shareholders."

### **Quarterly Cash Dividend**

On December 6, 2018, the Company announced that its Board of Directors had declared its first quarterly cash dividend of \$0.10 per share of Class A common stock, which was paid on December 27, 2018 to holders of record as of December 17, 2018. A distribution of \$0.10 per unit was also approved for holders of units in Solaris Oilfield Infrastructure, LLC ("Solaris LLC").

## Forward-Looking Statements

*This press release contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. Examples of forward-looking statements include, but are not limited to, statements we make regarding management changes, the outlook for the operation of our Kingfisher Facility, current and potential future long-term contracts and our future business and financial performance. Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. Because forward-looking statements relate to the future, by their nature, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. As a result, our actual results may differ materially from those contemplated by the forward-looking statements. Factors that could cause our actual results to differ materially from the results contemplated by such forward-looking statements include, but are not limited to the factors discussed or referenced in our filings made from time to time with the SEC. Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future developments or otherwise, except as may be required by law.*

**SOLARIS OILFIELD INFRASTRUCTURE, INC AND SUBSIDIARIES**

**(Unaudited)**

We view EBITDA and Adjusted EBITDA as important indicators of performance. We define EBITDA as net income, plus (i) depreciation and amortization expense, (ii) interest expense and (iii) income tax expense, including franchise taxes. We define Adjusted EBITDA as EBITDA plus (i) stock-based compensation expense and (ii) certain non-cash items and extraordinary, unusual or non-recurring gains, losses or expenses.

We believe that our presentation of EBITDA and Adjusted EBITDA provides useful information to investors in assessing our financial condition and results of operations. Net income is the GAAP measure most directly comparable to EBITDA and Adjusted EBITDA. EBITDA and Adjusted EBITDA should not be considered alternatives to net income presented in accordance with GAAP. Because EBITDA and Adjusted EBITDA may be defined differently by other companies in our industry, our definitions of EBITDA and Adjusted EBITDA may not be comparable to similarly titled measures of other companies, thereby diminishing their utility. The following table presents a reconciliation of net income to EBITDA and Adjusted EBITDA for each of the periods indicated.

	Three months ended			Year ended

**(In thousands)**

**(Unaudited)**

Adjusted pro forma net income represents net income attributable to Solaris assuming the full exchange of all outstanding membership interests in Solaris LLC not held by Solaris Oilfield Infrastructure, Inc. for shares of Class A common stock, adjusted for certain non-recurring items that the Company doesn't believe directly reflect its core operations and may not be indicative of ongoing business operations. Adjusted pro forma earnings per fully diluted share is calculated by dividing adjusted pro forma net income by the weighted-average shares of Class A common stock outstanding, assuming the full exchange of all outstanding Solaris LLC Units, after giving effect to the dilutive effect of outstanding equity-based awards.

When used in conjunction with GAAP financial measures, adjusted pro forma net income and adjusted pro forma earnings per fully diluted share are supplemental measures of operating performance that the Company believes are useful measures to evaluate performance period over period and relative to its competitors. By assuming the full exchange of all outstanding Solaris LLC Units, the Company believes these measures facilitate comparisons with other companies that have different organizational and tax structures, as well as comparisons period over period because it eliminates the effect of any changes in net income attributable to Solaris as a result of increases in its ownership of Solaris LLC, which are unrelated to the Company's operating performance, and excludes items that are non-recurring or may not be indicative of ongoing operating performance.

Adjusted pro forma net income and adjusted pro forma earnings per fully diluted share are not necessarily comparable to similarly titled measures used by other companies due to different methods of calculation. Presentation of adjusted pro forma net income and adjusted pro forma earnings per fully diluted share should not be considered alternatives to net income and earnings per share, as determined under GAAP. While these measures are useful in evaluating the Company's performance, it does not account for the earnings attributable to the non-controlling interest holders and therefore does not provide a complete understanding of the net income attributable to Solaris. Adjusted pro forma net income and adjusted pro forma earnings per fully diluted share should be evaluated in conjunction with GAAP financial results. A reconciliation of adjusted pro forma net income to net income attributable to Solaris, the most
